## Four Italians: Genoa, Mantua, Orvieto and Bologna

Oct 04 2025 to Oct 24 2025

Italy has so much to offer that it is impossible to see everything the country has to offer, probably even for Italians. This escorted, small group tour for senior couples and mature solo travellers, takes you away from some of the better known tourist cities such as Rome, Venice, Milan, Naples, Florence for example, and allows you to explore some extraordinary places that are not on the usual tourist route. This tour won't take you to Rome, Florence, Venice, Verona, Padua or Cinque Terra and so much more, instead we concentrate on four cities that have history, art, architecture and beauty to compare with any of their

better known, more visited, rivals.

This 21 day tour is particularly for the senior traveller who may have visited Italy before, but now wants to experience something a little different. We take an in-depth look at just four cities, each with an amazing past, and each with something different to reveal. This tour will appeal equally to the solo traveller, or those travelling with a companion, as we search out some lesser known treasures from Italy's long and often turbulent past. On this tour you can expect to see phenomenal artworks, visit architectural masterpieces from across the ages, taste some fabulous culinary delights, and discover a number of the greatest underrated cities in Italy.

## Orvieto

Perched dramatically on a tufa rock, displays its long past better than almost any other city in Italy. Here we can go underground into the tunnels that honeycomb the rock on which the city sits. These tunnels are at least two and a half thousand years old and, along with the tombs outside the old city, tell us much about the Etruscans who built them.

Orvieto has a medieval cathedral, a Renaissance well and a 19<sup>th</sup> century theatre, along with modern shops and great restaurants. While in Orvieto we'll take a trip out into the local wine growing region and visit the neighbouring town of Todi. We'll also have time to wander through the twisting streets, and walk along the medieval walls with fabulous views down into the valley below.

## Genoa

Is a large modern city with a long history. For many it is simply a jumping off point for the Italian Riviera, but Genoa itself has much to offer the senior traveller with an interest in more than lazing on the beach. The city's architecture speaks of its former glory as the "Most Serene Republic of Genoa" which ruled much of the Mediterranean in the 12<sup>th</sup> and 13<sup>th</sup> centuries. Genoa has more than 100 palazzi, all attesting to the wealth of the city's ruling class in the 16<sup>th</sup> and 17<sup>th</sup> centuries when this was one of Europe's most successful trading nations, and many of these are open to the public. There is also a busy

modern port, which has been recently transformed by local architect Renzo Piano. The museums are crowded with art, but not with other tourists, and the city is a maze of medieval streets just waiting to be explored. The stories are rich and diverse, from the beginnings of Banking, to Marco Polo in jail, Christopher Columbus's family home, to who does have the best pesto!

## Mantua

Provides a great contrast to bustling, crowded Genoa. The city, along with neighbouring Sabbionetta, was declared a UNESCO World Heritage site in 2008 because of its Renaissance heritage. Mantua is deeply entwined with the history of the Gonzaga family who, during their reign between 1328 and 1707, made the city a Court of great splendour. The city is small, and little changed from its glory days under Gonzaga rule. The artificial lakes surrounding the city have limited its size, and it is still possible to walk from one side to the other in little more than twenty minutes. In Mantua we concentrate on the amazing Renaissance art and architecture of a town which receives surprisingly few international tourists.

## Bologna

Is another large city with a long and illustrious past. This is a city with much more to recommend it than its meat sauce (though the food in Bologna is outstanding), and in our time in the city we'll uncover some amazing facts and amazing places. Bologna has Europe's (and possibly the world's) oldest university. It was founded in 1088 as a law school, and had its first woman graduate in 1732. Bologna is still a university city with a lively student population. This is a beautiful city, with many medieval and Renaissance buildings to admire as we wander the maze of old streets, many covered with UNESCO protected porticos. We'll visit the early theatres, galleries, and museums, but we'll also have time

to eat the food, drink the wine, and just soak up the atmosphere.

Remember that Italian cities are often best explored by foot, so don't forget your walking shoes!

Surveying it from one end is the rose window of Todi's Romanesque- Gothic Cathedral. Below the square are vast Roman cisterns, built in the 1<sup>st</sup> century BC, and over 80 metres long. The cisterns were part of a rainwater storage and drainage system that carried water from the Forum to the valley below.

The Tempio Malatestiano, the cathedral of Rimini, was begun in the 9<sup>th</sup> century, with work stopping in the 1400s, though the building was not actually complete. The church in its current form was constructed in 1447 at the behest of the notoriously ruthless military commander, Sigismondo Pandolfo Malatesta. Malatesta was part of the dynasty which ruled Rimini during the Renaissance period. Inside are works by important Renaissance artists including Giotto, Piero Della Francesca and Georgio Vasari.

The Museo Della Citta, situated in an old convent, contains a staggering 15,000 artefacts and relics dating back to the prehistoric era. The stunning Roman mosaics, ancient coins and glassware on display here are among the best in Italy.

Return to Bologna tonight and take our farewell dinner in a local restaurant.
